

Brandon Regional Health Centre in collaboration with the Manitoba Nephrology Nursing Course (Provincial Dialysis Program) will be offering a course for a Registered Nurse and/or Licensed Practical Nurse.

The course will start the week of March 24, 2019 running until May 25, 2019. The full 9 weeks of training will take place at the Brandon Regional Health Centre (clinical, theory and preceptorship). Training will be funded by the Brandon Regional Health Centre. Upon completion of this course, the successful applicant is qualified to practice in the Hemodialysis Unit.

Registered Nurse candidates should possess the following:

- Current active practicing registration in the C.R.N.M.
- Two years Acute Care Medical/Surgical or Critical Care experience as an RN within the last 5 years.
- Commitment to complete the Manitoba Nephrology Nursing Course and 1 year employment in the Hemodialysis Unit at Brandon Regional Health Centre following completion of the course.
- Current BLS
- Demonstrated leadership skills and professional/organizational activities
- Evidence of professional development (continuing education), activity in professional association and community involvement.
- Demonstrated skill of effective patient teaching
- Awareness of the interdisciplinary team approach and willingness to participate as a member of the Dialysis Team.
- Demonstrated problem solving skills
- Demonstrated management of conflict and change
- Demonstrated good interpersonal and communication skill

Licensed Practical Nurse candidates should possess the following:

- Current active practicing registration in the C.L.P.N.M.
- Two years Acute Care Medical/Surgical or Critical Care experience as an LPN within the last 5 years.
- Commitment to complete the Manitoba Nephrology Nursing Course and 1 year employment in the Hemodialysis Unit at Brandon Regional Health Centre following completion of the course.
- Current BLS
- Demonstrated evidence of completed IV/CVAD competency
- Evidence of professional development (continuing education), activity in professional association and community involvement.
- Demonstrated skill of effective patient teaching
- Awareness of the interdisciplinary team approach and willingness to participate as a member of the Dialysis Team.
- Demonstrated management of conflict and change
- Demonstrated good interpersonal and communication skill

Prior to the start of the course, successful applicants will be required to complete a self-study package and pass a pre-requisite test.

In order to be considered for the training, all applicants must submit a current resume including cover letter to:

Kim Wallis
CS1-134
Brandon Regional Health Centre
150 McTavish Ave East
